Michael Decter
Deputy Minister of Health
10th F. - 80 Grosvenor St
Toronto, Ontario M7A 1R3.

Dear Sir,

I am environmentally ill & implement many techniques in my healing & as tools in general; some of which are considered alternative, many of which are considered mainstream.

It is important to me in particular that the recommendations of the Thompson report be implemented. To the extent that these changes occur, will my rehabilitation be advanced such as to return me to society as a full participating citizen.

In particular I want supported:

1.) OHIP coverage for serial dilution titration sensitivity testing

2

2.) an environmental control unit for testing & unit here in Ottawa

3.) hospital rooms accessible to persons disabled (eg sensitivities)

4.) education on the topic for public health etc officials,

* 5.) continued recognition of patient histories as a valid diagnostic measure

*6.) funding of avoidance & nutritionally safe diets for treatments,

* 7. an end to discrimination by private insurance companies

Your co-operation in this endeavour would be so greatly appreciated.

Thank you for your attention.

Yours truly
